

INTEGRACare provides long or short-term care for clients, whether they are at home, in a retirement residence, in a long term care facility or in hospital.

We are on call 24 hours each day.

We provide qualified, experienced health care professionals at all levels who are interviewed, and thoroughly screened, including reference and police checks. All employees are bonded and provided with identification.

All clients get the attention of our nursing coordinators who are readily accessible for supervision or to answer queries and discuss concerns, whether those of the patient, the family, or the caregiver.

Our caregivers include registered nurses, registered practical nurses, personal support workers and registered physiotherapists and registered massage therapists.
